

We hope you enjoyed your 'Online safety for parents & carers' session & found it useful & informative.

Below are some key messages for you to give your child & some things for you to consider...

Key messages for your child about staying safe 'online'

Keep personal information private

Consider how they treat others when online

if they send nude or sexually explicit images of themselves or any other young person (including forwarding on) they are committing a criminal offence

Consider who they can talk to if they are ever worried about something that happens online & that it is never too late

Not everything they read or see online is necessarily true & so always check the source of the information

Never arrange to meet up with someone they have met online

Save evidence of any abusive/ bullying messages, images or videos

How & where they can report abuse or inappropriate communication

How you can keep your child safe 'online'

Promote yourself as someone they can talk to if they are worried about anything that happens online, & that it is never too late to tell or report

Check privacy settings on all accounts within apps & games

Set up time limits for how long your child is online

Check they are not sharing their location via social media 'apps'

Put passwords on any bank cards linked to devices/ accounts

Monitor who it is they are communicating with via messages & headsets

Ensure they are reminded never to meet up with an online friend

Use the resources available to you to educate yourself on the 'apps' or games they are using / playing

Where you can get more help/ support...

www.kidsonlineworld.com is a website from ECP Ltd
"The more you know, the better!"

KIDSONLINENEWORLD

Updates via emails and vlogs, & full of information for parents about the latest apps & games that children are using. It is designed to help you make an informed decision regarding the suitability of apps & games & how to use them in the safest way
